

Graduation exercises provide the greatest opportunity for communicating the academic achievement of the students of the Johnson City Central School District and to honor all members of the graduating class. Graduation exercises also present opportunities for community involvement and school-community relations. Each of these factors should be considered and blended together for an impressive, memorable and meaningful graduation program.

The senior class students and the high school professional staff under the leadership and guidance of the high school principal shall prepare plans for the graduation exercises. Final plans and all school related graduation activities shall require the Superintendent's approval.
