

Students, parents, and staff members must constantly be aware of the tremendous pedestrian and vehicle traffic flow around each school building. Students are asked to ride the school bus where such service is available. Students should walk where bus service is not provided as these are minimal distances.

It is recognized in the final analysis, that students and their parents do have the right to determine that the student may drive a car to school. Student cars may be parked on school property only with the prior approval of the principal and only in the specific parking space authorized by the principal.

Unsafe operation of any motor vehicle or failure to comply with any rules established by the principal shall result in a termination of the principal's approval for parking privileges.
