

While reviewing the initial draft of the budget, the Superintendent will establish priorities to be recommended to the Board. The priorities will be based upon the needs identified through the district's planning process and by the Board. The Board will consider the Superintendent's recommendations and confirm those priorities the Board wishes to present to the public. Adequate funds and resources will be provided for their accomplishment.

Prior to the public hearing concerning the budget, the Board will firmly establish priorities by approving a budget to be submitted for the public vote.
