

The Superintendent shall prepare an annual report to the Board which forecasts enrollment for the school district for a minimum of five years. This enrollment projection shall be under constant review by the superintendent and any significant change that is calculated during the year shall be brought to the Board's attention.

The Superintendent shall maintain communications with municipal agencies concerned with community planning and development and such other sources that may provide data for projecting enrollment patterns. The superintendent's report shall be correlated with the reports of other local agencies and any differences explained.
