

The Board charges the school lunch director with the responsibility of recommending procedures and policies to keep the school district in compliance with all regulations that will insure continued participation in the National School Lunch and Breakfast Program. All recommendations that require Board action shall be made through the Superintendent or designee.

It is the Board's desire that all children receive nourishing meals and therefore directs all members of the school district staff to assist any student who may benefit from the free and reduced price meal program. All information pertaining to students who apply for or receive free and reduced price meals shall be treated in a strictly confidential manner.
